

High Intensity Soil Map
Notes:

Sketch Map Method

This map may/maynot be compiled utilizing existing information from surveys. This map is intended for the purposes of septic system permitting and is to be used for no other purpose. The accuracy of the location information of the soil area is not intended to be relevant to the survey information.

Soil soils underlined by red and green have favorable properties for onsite wastewater disposal system if the required soil improvement practices and restrictions can be met at the standard or otherwise listed absorption rates.

Legend:

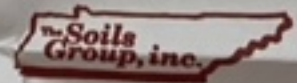

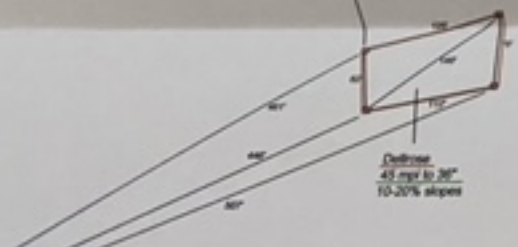

- Edge of evaluation
- - wood stakes for ground control purposes only

Any disturbance to these soils after this date can void their favorability.

Soil site stakes on ground are for ground control purposes only and do not necessarily designate favorability.

The Soil Consultant's signature does not constitute approval by the Environmental Dept.
